Assurance & Accounting Services

# Assurance & Accounting Services

---

## Your Most Trusted Advisor

Our personal approach and our dedicated interest in your continued success means that we work very hard to learn all we can about you...and your business. We develop a customized approach to assist you in achieving all your goals, not just at tax time or financial statement preparation time, but throughout the year, and year after year. It is our personal goal to become your "most trusted advisor".

## Quality Service

Catalyst participates in the Canadian Allinial Global National standards group. 13 firms across Canada collaborate on research, communication and application of Generally Accepted Accounting Principles and Generally Accepted Auditing standards. This joint initiative helps ensure that clients get up-to-date support in a timely and efficient manner.

## We do not provide Audit Services to Public Companies

By focusing on the needs of private business and other non-public clients, we are able to allocate resources efficiently and effectively in the best interests of our clients. They do not end up paying for the extremely costly infrastructure and exposure to risk that other professional accounting firms must maintain and endure in order to audit public companies.

## Assurance & Accounting Services

- Financial statement preparation: compilation review and audit
- Income tax compliance reporting
- Owner/manager compensation planning
- Industry benchmark and financial ratio analysis
- Cash flow analysis
- Preparation of budget models
- Forecasts and projections
- Accounting system review
- Family succession and transition planning
- Preparation of Agri-business government program applications
- Review of internal control systems
- Process re-engineering

## Industry Experience

We provide services to a number of industries including:

- Agriculture
- Construction
- Dealerships
- Hospitality
- Manufacturing
- Oilfield
- Professionals
- Retail
- Transportation
